The attached GeoReferenced PDF maps show the different suggested Christmas tree cutting areas managed by the Salt Lake Field Office. GeoReferenced PDFs are maps that can be printed or when uploaded to a device with a GPS like a smartphone, they can be used to find yourself on the map, measure distances and areas, mark places, and share your location.

For an app like Avenza Maps, PDF Maps, and TerraGo Edge the easiest way to open the map is to locate the file in your email and open it with your app by sharing or sending it to the app.

Once open, you can see the map and if you are within the border, you should see a marker indicating where you are. Use this to identify where you want to cut and the best way to get there. Some apps may need internet, subscription, or license. You choose and use the app you want. The BLM does not recommend or support any app.

These Christmas tree cutting maps are highlighting suggested areas to cut. You are permitted to cut on any BLM lands except for **CAMPGROUNDS, WILDERNESS STUDY AREAS, SPECIAL RECREATION AREAS and INDICATED CRUCIAL HABITAT**. Please use the referenced maps to avoid those areas.

Click below on a cutting area name to locate it on a map and directions.
