PARIA RIVER DISTRICT
STIPULATIONS FOR SALE AND HARVEST
OF CHRISTMAS TREES
NON-COMMERCIAL

Each permittee is allowed to harvest trees on BLM Lands in the Paria River District except in Wilderness Study areas. This permit is not valid on private, state, or Forest Service lands.

Tree species that can be harvested are, Pinyon Pine (single and double leaf) and Utah Juniper.

PINYON PINE

****

Mature trees average 25 feet high. Double-leaf Pinyon needles are 1 to 1½ inches long, in clusters of two. Single leaf Pinyon needles are 1½ to 2 ½ inches long. Needles feel sharp to the touch. Found in elevations between 5,000 and 9,000 feet. Usually found with Utah Juniper.

UTAH JUNIPER

****

Mature trees average 20 feet high. Needles are ⅛ inch in length, scale like in appearance. Needles feel soft to the touch. Trees are usually bushy with rounded crown and a trunk that is forked or occasionally with a central dominant trunk Found in elevations between 4,500 and 8,500 ft. Usually found with Pinyon Pine.

Trees must be cut as close to the ground surface as possible. Stump height must not exceed 6 inches.

Tree must be tagged at the location of harvest and the tag must remain on the tree until point of use.

Limited to two permits per household.

The purchaser will comply with all off-road vehicle designations.

I have read and agree to comply with these stipulations as part of the attached contract
